Study Questions

Introduction

For each section of the text on core GATT principles and WTO rules — the authors illustrate the issues with GATT and WTO cases. You should be able to:

- 1) identify the GATT violation or WTO Agreement violation at issue in the case**
- 2) locate the arbitral panel's rationale for whether there is/or is not a violation**
- 3) locate places where the panel analyzes the interrelationship between GATT rules**
- 4) locate the places where the GATT panel explains how a GATT/WTO case should be litigated**

Study Questions have been provided for every major topic covered in the course. You should use them to prepare for class and review for the exam. One set of questions (Study and Review Questions) is designed to help you integrate the three major sections in the course.
