

## COMPUTER ACCESS IN THE LIBRARY

By Susan Spillman

Computer Instructional Services Librarian

### Computer Network

Every seat in the library provides access to a wired network and power connection. No configuration is usually necessary—just plug in your network cable and surf. All you need is a network card and network cable for your laptop. If your laptop is equipped with a wireless network card, you may access our wireless network. It is a secured network for our faculty and students only. You must fill out a Wireless Network Registration Application form. On this form, we need your wireless card's unique MAC address. We input this number to allow you access, and you will input a password we give you to gain access to the Wireless Network. If you need help with configuring your laptop after you receive the password, please stop by the Computer Help Desk in Room 3011. Application forms are available in the publication rack near the Help Desk on the 3<sup>rd</sup> floor of the library. Wireless is available on all floors of the Library building, the student lounge, and student organization offices.

### Library Computers

The computers on the 2<sup>nd</sup> floor of the library are intended for quick Internet or email access. We do not have any word processing software on those computers for this reason. Please use the computers in the computer labs on the 3<sup>rd</sup> floor for extended computer use.

---
